TRUSTOP

#48836 - TruStop Control Stop W/Trucheck Closet

#48837 - TruStop Control Stop W/Trucheck Urinal

#48835 - Back Check Assembly For Trustop

The Delany TruStop with patented ball valve design allows you to shutoff the water easily at the stop to replace the failed backcheck.

Control stops in flush valves will fail over time. With traditional flush valves, replacing the Control Stop requires turning off the water to the bathroom, a hall or floor, sometimes the entire building. This patented breakthrough in commercial flush valve technology ends the need for costly after-hours repairs. One person can do the job in minutes, not hours.

PRODUCT FEATURES:

- Vandal proof
- Simple 1/4 turn for shutoff
- Ball valve design that will last for decades
- Retrofits with all leading flush valve brands
- Replaceable check assembly
